

LINDAU
NOBEL LAUREATE
MEETINGS

74th Lindau Nobel
Laureate Meeting
(Chemistry)

Programme

29 June – 4 July 2025

MEETING PROGRAMME

This booklet contains the complete Scientific Programme, some of whose sessions may have restricted access (pre-registration required).

LATEST UPDATES

The information contained in this programme is valid as of 10 June 2025. Please feel free to access the latest version of the programme via QR code or at programme.lindau-nobel.org.

YOUR PERSONALIZED SCHEDULE

In your personal documents handed out on arrival, you will find a list of exclusive events for which you have pre-registered or which have been arranged for you personally.

KEY VISUAL

Inspired by the 2024 Nobel Prize in Chemistry, awarded to David Baker, Demis Hassabis, and John M. Jumper, the cover design revolves around the theme of proteins. Thanks to his newly developed computational methods, Baker was successful in designing entirely new proteins while Hassabis and Jumper used AI and took the prediction of three-dimensional protein structures to a new level. The cover visual thus seeks to represent the discovery of all known protein structures as the basis of the most recent Nobel Prize in Chemistry.

Welcome

Pleasure to meet you. At last! We are excited to welcome you to the beautiful city-island of Lindau. This is where the “Lindau Spirit” unfolds its famous effect. This is where our motto “Educate. Inspire. Connect.” becomes reality. Together, let us celebrate the 74th Lindau Nobel Laureate Meeting.

Bridging borders, nationalities, ethnicities, languages, religions in times when it is particularly needed. Let us make this gathering fulfill Alfred Nobel’s call – and act “for the benefit of humankind.”

Main Hall

Consequences of the Nobel Prize*Frances H. Arnold**California Institute of Technology, United States of America**Martin Chalfie**Columbia University, United States of America**John M. Jumper**Google Deep Mind, United Kingdom**Moderator: Nils Hansson**University of Düsseldorf, Germany*

It still is an open research question why no other scientific award attracts as much attention around the globe as the Nobel Prize.

Given the huge media interest, some Laureates develop routines to deal with the flood of invitations. Francis Crick, for example, printed a correspondence card in response to the pile of unsolicited requests he received: "Dr Crick thanks you for your letter but regrets that he is unable to accept your kind invitation to: ... cure your disease, appear on TV, accept an honorary degree etc."

This session traces prize effects with three panellists, the Nobel Laureates Frances H. Arnold, Martin Chalfie, and John M. Jumper.

The discussion is chaired by Nobel Prize historian Nils Hansson.

Opening Ceremony (ctd)

16:30

Inselhalle

Main Hall

A Welcome to Bavaria*Markus Blume**Bavarian State Minister for Science and the Arts***Ensemble of the Vienna Philharmonic***Andreas Großbauer, Violin**Holger Groh, Violin**Robert Bauerstatter, Viola**Teodora Ivanova, Cello***Masters of Ceremonies:***Adam Smith, Nobel Prize Outreach, Sweden**Swathi Naidu Vakamulla Raghu, University of Siegen, Germany***Social Event**

We will discuss the transformative impact of AI technologies in chemistry. Our expert speakers and panellists will discuss AI's groundbreaking applications in drug discovery, materials science, and chemical research.

Discussions will spark insights into how machine learning, data analysis, and predictive modelling can streamline processes, enhance research accuracy, and foster innovation in chemical experimentation.

Sir M. Stanley Whittingham

Binghamton University (SUNY), United States of America

Moderator: Deirdre Black

The Royal Society of Chemistry, United Kingdom

It is a decade since the UN adopted the 2030 Sustainable Development Goals, and this session will focus on the contribution of chemistry to achieving these goals. The panel is to discuss how chemistry research is contributing to overcoming challenges from climate and energy to environment and health.

The discussion will also consider the opportunities and challenges in making chemistry itself more sustainable, linking to green chemistry, green labs, circularity, and resource efficiency. Panellists will also share perspectives on how scientists can influence sustainability in broader ways such as policy, education, and leadership.

CAVAZZEN MUSEUM

OPENING HOURS (TUESDAY – SUNDAY) 10:00–18:00

Guided tour in English language: Sunday, 29 June 11:30

Enjoy free access to this special exhibition with your Young Scientist name badge.

Ride to Milan with the “Lindau Messenger” or travel through the centuries in just ten minutes by time machine.

Enjoy stunning views and fascinating stories, experience history – interactive, inclusive, and multimedia-based.

After extensive redesign, the Cavazzen presents itself in a surprisingly different light – including an exhibition on the Lindau Nobel Laureate Meetings.

The Lindau Meetings: Our Ambition and History

For over seventy years, the Lindau Nobel Laureate Meetings have served as unique forum for exchange between Nobel Laureates and Young Scientists. Every summer, more than 600 of the world's most talented Young Scientists and more than 30 Nobel Laureates are invited to spend a week in Lindau on the German side of Lake Constance, a week full of mutual inspiration and scientific encounters. Since the first Meeting in 1951, more than 35,000 Young Scientists have participated in the Lindau Meetings – for many of them, it has been an experience that has changed their careers and lives, making them part of a unique international network of scientific excellence. Even after years and decades, they are still connected with each other and with the Lindau Meetings through the Lindau Alumni Network.

The original idea of the Meetings goes back to two physicians based in Lindau, Franz Karl Hein and Gustav Wilhelm Parade, as well as to Count Lennart Bernadotte af Wisborg, a member of the Swedish royal family who quickly became the spiritus rector of the Lindau Meetings. From the start, they saw the Meetings as a means to reconcile the peoples of post-war Europe, in particular, the younger generation. Lindau quickly developed into an international forum for the exchange of knowledge between nations, cultures, traditions, and disciplines.

A Council and a Foundation: Lindau's Organizational Set-Up

The Lindau Nobel Laureate Meetings are conducted annually during one week at the end of June. Every third year, they are supplemented by the Lindau Meeting on Economic Sciences. The Meetings are officially organized by the Council for the Lindau Nobel Laureate Meetings and the Foundation Lindau Nobel Laureate Meetings, with the Executive Secretariat being responsible for planning and realization. The Council oversees the Meetings' strategic development and programming. It is presided over by Countess Bettina Bernadotte af Wisborg while its members comprise internationally renowned scientists from the fields of medicine, physics, chemistry, and economics. In its work, the Council benefits from the commitment of the secretaries of the various bodies awarding the Nobel Prizes, who are also represented in the Council.

At the initiative of 50 Laureates, the Council and the Bernadotte Family established the Foundation Lindau Nobel Laureate Meetings in 2000. Succeeding to Wolfgang Schürer, Jürgen Kluge has been serving as the chairman of its board since 2016. In addition to ensuring sustainable funding, its key priorities comprise initiatives to further the advance-

ment of the Lindau Meetings and to expand our international network of Academic Partners.

Since its beginning, the Foundation has been enjoying enormous success, not least among Nobel Laureates. More than 375 Laureates are members of its Founders' Assembly. Through their membership and their engagement with the Lindau Spirit, they demonstrate their support for the mission of the Lindau Nobel Laureate Meetings. Similarly, personalities from the worlds of science, politics, and industry have been inducted into the Foundation's Honorary Senate in recognition of their special commitment to scientific excellence and the promotion of Young Scientists.

Making Lindau Possible: Our Funders and Supporters

The Lindau Nobel Laureate Meetings are made possible thanks to the support received from supranational, national and regional bodies, companies, associations, and private patrons. Furthermore, various international companies, foundations, associations, and private maecenates assure the financial basis for the Lindau Meetings through donations to the Foundation's endowment. Interest earned on the endowment plus additional annual contributions by benefactors help to cover the budget of the Lindau Meetings. Donations in kind also play an important role in organizing the Meetings at the present standard. Not least, Lindau's success story is owed to the commitment shown by the Laureates, members of the Council and of the board of the Foundation during the preparation, realisation, and evaluation of the Lindau Meetings. A full list of supporters is enclosed in this programme.

Our Global Network of Academic Partners

In accordance with our ambition to make the Lindau Nobel Laureate Meetings accessible to the best Young Scientists from all over the world, we run an international, multi-stage selection process every year. None of this would be possible without our global network of Academic Partner institutions that broadcast the annual call, receive the applications, make a pre-selection, and nominate the most talented candidates from their country to apply for participation in a Lindau Meeting. Today, we closely collaborate with more than 200 internationally renowned science and research institutions.

Our Programme Formats

Based on the principle of dialogue, our Scientific Programme offers various formats facilitating the exchange of knowledge, ideas, and experience between and among Nobel Laureates and Young Scientists.

Lectures

Lectures are given by Nobel Laureates only. Some may like to explain the research that won them the Nobel Prize, but Laureates are free to choose a topic of their liking.

Agora Talks

This is a particularly flexible and interactive format – be it one Nobel Laureate giving a presentation or several Laureates interacting in the discussion of a topic. In all cases, a qualified moderator leads Q&A from the audience, a lively discussion, or an in-depth interview.

Open Exchanges

In addition to Lectures and Agora Talks, many Nobel Laureates offer one of these sessions, which are particularly research-oriented and thus strictly limited to Laureates and Young Scientists. Switching between sessions should be avoided.

Panel Discussions

Several panellists jointly discuss one topic, followed by Q&A from the audience.

Heidelberg Lecture

Inspired by the Lindau Nobel Laureate Meetings, our long-standing supporter and Honorary Senator, the late Klaus Tschira, founded the Heidelberg Laureate Forum (HLF) in 2013. The HLF is dedicated to laureates and young scientists from the fields of mathematics and computer science. As token of our outstanding partnership, Lindau hosts a Heidelberg Lecture every year while, in turn, a Lindau Lecture is part of the HLF's annual programme.

Thematic/Open Next Gen Science Sessions

The Next Gen Science (NGS) Sessions provide a platform for Young Scientists to present their own work in short presentations with 6 minutes of speaking time and 3 minutes of discussion. The applications for the Topic NGS Sessions were pre-evaluated by Lindau Alumni with expertise in the respective fields. In contrast, the applications for the Open NGS Sessions were pre-evaluated by the Young Scientists of the meeting. The final selection was conducted by the scientific chairpersons.

Workshops

Workshops invite Young Scientists to actively work on a topic, e.g. by developing implementable action items in small groups.

Science Walks

During a Science Walk, a Nobel Laureate and up to ten Young Scientists spend their time exploring picturesque spots in Lindau and its surroundings – an almost unsurpassed occasion for personal and informal discussions.

Laureate Lunches

Laureate Lunches offer one Nobel Laureate and up to ten Young Scientists the opportunity to talk science (and other things) informally at one of Lindau's atmospheric restaurants.

Science Breakfast

Traditionally on Wednesday of the programme, the Lindau Meetings host their own Science Breakfast to encourage further exchange between all participants, usually on a current topic of interest.

Partner Events

Partners of the Lindau Meetings are invited to organize side events outside the core programme, e.g. in the mornings (Partner Breakfasts) or evenings (Partner Dinners or other Partner Dialogues).

Morning Workouts

If you need a break from thinking and talking, why not join one of our Morning Workouts?

The Lindau Nobel Laureate Pier

There is hardly any other place in the world where so many Nobel Laureates have met regularly besides Lindau. The Nobel Laureate Pier is the best evidence of this. The central station of Lindau's Science Trail, the Pier was opened in 2019 thanks to the support of the Beisheim Stiftung and the City of Lindau.

Located on the "Kleiner See", the so-called "Small Lake", it offers a view of the mainland and is conveniently situated behind the "Inselhalle", the main venue of Lindau Nobel Laureate Meetings. All Nobel Laureates who have ever been to Lindau are listed here on their own bar in the guardrail – currently more than 400! On each bar, you can read the name, the year of the Nobel Prize, and the year of the first visit to Lindau. The bars of Laureates visiting Lindau for the first time are marked with a yellow ribbon. Laureates returning to Lindau have an petrol-coloured ribbon.

If you want to locate a particular Nobel Laureate on the pier, you can use the web-based search function shown at the entrance of the pier. The search function also links to further information in the Lindau Mediatheque.

THE LINDAU GUIDELINES

01 Adopt an Ethical Code

02 Cooperate Globally on Global Problems

03 Share Knowledge

04 Publish Results Open Access

05 Publish Data to Repositories

06 Work Transparently & Truthfully

07 Change Reward Systems

08 Support All Talent

09 Communicate to Society

10 Engage in Education

The Lindau Guidelines aim for an open, cooperative science community where data and knowledge are freely shared. Based on an initiative by Nobel Laureate Elizabeth Blackburn, the ambitious goals have been discussed, amended, and refined. The successful implementation of the Lindau Guidelines relies on the commitment of the global community of scientists and researchers.

Since their release in June 2020, the Lindau Guidelines have been endorsed by more than 40 Nobel Laureates, supported by several scientific institutions, and signed by a growing number of researchers.

Find out how you can support the Lindau Guidelines on lindauguidelines.org.

For all updated information about bus operating hours, departure times, and the Lindau bus stops, please download the App “Stadtbus Lindau” from the App Store/Play Store.

Special Operating Hours During the Lindau Meeting

From Monday, 30 June, to Thursday, 3 July, the last buses leave from Inselhalle / the central connection point (ZUP) as follows, serving all stops along their routes:

- Monday night, 30 June, 23:57 at Inselhalle / 00:10 at ZUP
- Tuesday night, 1 July, 22:57 at Inselhalle / 22:59 at Toskanapark / 23:10 at ZUP
- Thursday night, 3 July, 22:57 at Inselhalle / 23:10 at ZUP

All other bus lines run as indicated in the timetable.

RESPONSIBILITY

The Lindau Nobel Laureate Meetings and its boards, team, and staff are working hard to leave a positive footprint.

Since 2020, we are a climate-positive event.

Encouraged by the Young Scientists' initiative IDEA, we are also continuously improving aspects of inclusion and diversity.

Read more about the details at lindau-nobel.org/responsibility.

Dietary Needs

Should you have any dietary needs, please make sure to check with one of our desks or the catering service.

Medical Assistance

- In case of urgent, life-threatening medical issues, call 112 and/or contact any member of our staff.
- In case of urgent but not life-threatening medical issues, please see the paramedic team on site or contact one of our desks in person or by phone.

Code of Conduct

The Meetings have implemented a code of conduct, detailing appropriate and inappropriate behaviour. Please make sure to adhere to it. See code.lindau-nobel.org for details.

If you feel that the Meetings' code of conduct has been violated in a substantial way, you may contact our front desk staff or write to the Meeting's ombudsperson at ombudsperson@lindau-nobel.org.
