Good to Know	<i>page 54</i>

The 6th Lindau Meeting on Economic Sciences takes place during a climate of intense debate in society and science. Radical ideologies and re-emerging separatist or nationalist sentiments add to a growing sense of insecurity and isolation. Recent political decisions and their consequences are signs of a global volatility. Further uncertainty is created by the trend of post-factual statements and science denial in public discourse. James J. Heckman gives a possible response to this dilemma in a video on the future of economics: “Empirical economics that’s grounded in solid data is a vaccine against this post-truth world.”

In 1951, the post-war vision of the founders Franz Karl Hein, Gustav Wilhelm Parade and Count Lennart Bernadotte was to reconnect German scientists to the international scientific community, to overcome the borders between nations and minds and to work towards a future of peace and scientific progress. In 2004, the Lindau Meetings on Economic Sciences entrenched the tradition of Nobel Economists adding their perspective to the international discourse in Lindau.

For the young economists, the Lindau Meeting is a once-in-a-lifetime experience that hopefully has a lifelong impact. Over the last 67 years, about 32,000 young scientists have taken part in the meetings. Our online media-theque makes the programme of the meetings accessible for the broader public. Every year, the extraordinary “Lindau spirit” creates lasting personal connections and professional networks. Our alumni initiative aims to identify existing connections and to retie loose ends. Launched in the summer of 2017, the new online community Lindau Alumni Network offers a space to connect, discover and collaborate with fellow Lindau Alumni.

With every meeting, we aim to further increase the opportunities of dialogue between laureates and young economists. This year, we are expanding formats of exchange into afternoon seminars: Selected economists will have the opportunity to present their work to a group of laureates. Communication during the week will be improved by a meeting app that allows up-to-date programme information.

The Lindau Science Trail, a public exhibition project integrating science into the Lindau city space, is a new addition to our outreach efforts as part of our “Mission Education”. Citizens and tourists alike can learn about Nobel Prize-awarded discoveries in prominent locations, with 18 pylons distributed across Lindau and three pylons on Mainau Island. All Nobel Prize disciplines are covered; two pylons address economics related topics. A corresponding augmented reality app enhances the learning experience. Later this year, a pier at the Inselhalle will be constructed to honour the more than 450 Nobel Laureates who have enabled as well as enriched past and present Lindau Meetings since 1951.

Through dialogue and discovery, science can offer solutions to the problems of today. In the spirit of Alfred Nobel, science can champion the wellbeing of humanity. This, too, is part of the unique spirit of Lindau.

We wish you a most rewarding time at the Lindau Meeting!

*Council for the Lindau Nobel Laureate Meetings

WEDNESDAY, 23 AUGUST

Boarding & Transfer to Friedrichshafen (Dornier Museum)

Access: laureates, young economists

Access for guests/journalists by invitation only

For laureates:

Transfer either from your hotel or Toskanapark.

For guests, journalists and young economists:

Meeting point for the transfer is at Toskanapark. Please make sure to be there on time.

WEDNESDAY, 23 AUGUST

19.00
Social Function

Get-Together

Welcome

Countess Bettina Bernadotte

President of the Council for the Lindau Nobel Laureate Meetings

Dinner Speech

Peter Altmaier

Head of the German Federal Chancellery and Federal Minister for Special Tasks, Germany

Dinner and Music

Note:

Free seating for young economists with a Nobel Laureate of their choice.

Please take a look at the seating arrangement in the main hall of the Dornier Museum.

23.00
Friedrichshafen

Departure (Dornier Museum, Friedrichshafen)

Return buses will go to various destinations:

- Lindau Island (all hotels on Lindau Island)
- Bad Schachen (Hotel Bad Schachen, Villa Alwind, Hotel Ebnet Garni, Parkhotel Lindau, MAXHOTEL)

Please make sure to check the signage on the buses.

23.30

Arrival (Lindau)

Partner Event

07.00

Arrival (Hotel Bad Schachen)

18.45
Lindau Harbour

Arrival (Lindau)

When the boat leaves the harbour of Mainau Island and sets course back to Lindau, you have just become member of a very special group: The Lindau Alumni Network.

More than 32,000 young scientists have attended the meetings since 1951, everyone with his very own experiences. For most of them, Lindau has been a once-in-a-lifetime event, changing or influencing the direction of his or her future career. Many have become highly successful scientists, and one has actually managed to win the Nobel Prize.

Join our network by registering to alumni.lindau-nobel.org.

Find your friends from this year, previous years, your hometown, your field of research – and stay in contact with them. Groups, message boards and shared documents are tools offered online. Selected Job offers only for Lindau Alumni may open a new door for your scientific career.

Plus, there are now more and more alumni meetings taking place world-wide. And if you would like to organise an alumni activity yourself, just tell us about it by writing to alumni@lindau-nobel.org.

ABOUT THE MEETINGS

The Meetings

The Lindau Nobel Laureate Meetings – established in 1951 – provide globally recognised forums for exchange between Nobel Laureates and young scientists. They inspire scientific generations and build sustainable networks of young scientists around the world.

The original idea of the meetings goes back to the two Lindau physicians Dr. Franz Karl Hein and Professor Dr. Gustav Wilhelm Parade as well as Count Lennart Bernadotte af Wisborg, a member of the Swedish royal family who quickly became the spiritus rector of the Lindau Meetings. It was them who recognised very early the significance of the meetings for the reconciliation of the people of post-war Europe and thus systematically developed them to an international forum for the exchange of knowledge between nations, cultures and disciplines.

The Organisers

The Council for the Lindau Nobel Laureate Meetings and the Foundation Lindau Nobel Laureate Meetings organise the annual one-week events. The executive secretariat is responsible for planning and realisation.

Countess Bettina Bernadotte af Wisborg is President of the Council, which sets the course for the Lindau Meetings' concept and programme. Internationally accredited scientists from the fields of medicine, physics, chemistry and the economic sciences are members of the Council. The work of the Council benefits from the commitment of the secretaries of the assemblies responsible for awarding the Nobel Prizes, which are represented in the Lindau Council.

The Foundation was established in the year 2000 by 50 Nobel Laureates, the Council and the Bernadotte family. In 2016 Prof. Dr. Jürgen Kluge followed Wolfgang Schürer as Chairman of the Board of the Foundation. Joint initiatives regarding the advancement of the Lindau Meetings and the establishment of an international network of academic partners are key priorities in addition to ensuring sustainable funding.

The Lindau Meetings enjoy widespread support. More than 300 Nobel Lau-

ABOUT THE MEETINGS

reates are members of the Founders Assembly of the Foundation and demonstrate – through their membership and their participation in the Lindau dialogue – their support for the principle of the Lindau Nobel Laureate Meetings. Personalities from the worlds of science, politics and industry have been inaugurated into the Foundation's honorary senate in recognition of the special commitment they have shown towards scientific excellence and the promotion of young scientists.

Funding of the Lindau Nobel Laureate Meetings

The Lindau Nobel Laureate Meetings are made possible thanks to the support received from supranational, national and state bodies, companies, associations and private patrons.

International companies, selected foundations, associations and private patrons assure the material basis for the Lindau Meetings by making donations to the assets of the Foundation Lindau Nobel Laureate Meetings. Interest earned on the endowment, plus additional annual contributions by benefactors cover the budget of the Lindau Meetings. Donations in kind also play an important role in raising the professional level of the meetings. Not least the success of the Lindau Meetings can also be attributed to the commitment shown by the Nobel Laureates, members of the Council and the board of the Foundation during the preparation, realisation and evaluation of the meetings. A full list of supporters is enclosed in this programme.

The Academic Partners Network

The Lindau Nobel Laureate Meetings interact closely with a global network of academic partners to identify highly-talented young scientists and to nominate them for participation. Partners include national academies of science, ministries, research institutions, top-ranking universities, foundations and international scientific organisations. Without this support, the Lindau Nobel Laureate Meetings would not be able to identify and invite the most gifted scientific talents world-wide.

ABOUT THE MEETINGS

The world's best young scientists of tomorrow submit applications to attend the Lindau Nobel Laureate Meetings. An international, multi-stage selection process makes sure that the scientific elite of the future is able to come together with the Nobel Laureates in Lindau. Every year, several thousand young scientists apply worldwide.

A full list of academic partners can be found in the Participant Directory.

Brown	Contractors of third parties
Green	Council & Foundation
Black	Staff of the Executive Secretariat

ABOUT THE MEETINGS

Programme Session Types

The 6th Lindau Meeting on Economic Sciences features a variety of session formats.

In general, the mornings usually offer plenary formats, while the afternoons add more interactive elements.

Lectures

Plenary lectures are given by laureates only. They may choose a topic of their liking – be it their Prize research, be it something else. As the time is limited to thirty minutes, there is usually no discussion.

Panel Discussions

In a plenary panel discussion, several panelists jointly discuss one topic. This year, three discussions will take place: on Thursday ("Contracts, Incentives and Organisations"), on Friday ("New Conditions for Monetary and Fiscal Policy") and on Saturday ("What Could and Should We Do about Inequality?").

Seminars

This format offers an exchange between young economists and laureates. Selected young economists present their research in short presentations, followed by comments from one or more laureates. An in-depth discussion may take place afterwards, during breaks and/or at meals. Attendance is on a first-come, first-served basis.

Science Breakfasts

Science Breakfasts are additional options for a more informal exchange. They are organised by Lindau's partners, featuring talks, discussions and a joint breakfast. Attendance requires online pre-registration.

SUPPORTERS

The Lindau Nobel Laureate Meetings would like to thank all maecenates, patrons and donors for their contributions to the endowment of the Foundation.

BUS LINES & TIME TABLE

How to Read the Time Table

The time table on the opposite page shows operating hours and departure times for all four lines and both directions. The first three columns (earliest, Saturday, Sunday) indicate when the earliest bus runs from each stop, while the last columns show the last service. The two middle columns (every hour at) show when buses depart between the first and last service. Example: 24/54 means that this bus departs from the station every hour at minute 24 and 54 (e.g. at 15.24 hrs and 15.54 hrs).

	earliest	Saturday	Sunday	every hour at	latest		earliest	Saturday	Sunday	every hour at	latest

NIGHT LINE BUS LINES & TIME TABLE

FRIDAY AND SATURDAY

Special Operating Hours during the Meeting

On Tuesday, Wednesday and Thursday night the last buses leave at 22.40 hrs from the central connection point (ZUP) and serve all stops along their lines.

On Friday and Saturday night the last buses leave at 00.40 hrs from the central connection point (ZUP) and serve all stops along their lines.

How to Read the Time Table

The time table on the opposite page shows operating hours and departure times for all four lines and both directions. The first three columns (earliest, Saturday, Sunday) indicate when the earliest bus runs from each stop, while the last columns show the last service. The two middle columns (every hour at) show when buses depart between the first and last service. Example: 24/54 means that this bus departs from the station every hour at minute 24 and 54 (e.g. at 15.24 hrs and 15.54 hrs).
